

## OBSOLESCENCE MANAGEMENT SOLUTIONS

Proactive approach for Bills of Material analysis

### WHO WE ARE

We are a small Certified Minority Business Enterprise founded in 2010 in the wake of the massive layoffs taking place at Kennedy Space Center due to the Space Shuttle retirement. Talented highly technical Engineers who placed their heart and soul to ensuring the Safety and Reliability of the Space Shuttle Program were given two options- to seek other employment or wait it out. The third option was crafted by SPADESCO founders- unite the talent by targeting key engineers and develop a company that will be able to provide quality support to the Space & Defense Industry. With drastic change comes drastic opportunity, and with opportunity, came SPADESCO- a company seeking not only to provide insight support but also oversight by seeking quality talent for quality sustainment.

- Flexible pricing options, per part or BOM
- Flexible availability onsite and off site
- Cage Code and NSN updates for data clarity
- Experienced Component and Logistic Engineers
- Local Company in your Zip Code!

## Maintainability Assurance

# Logistic Engineering that Matters!

THE ASSURANCE SPECIALIST-  
SAFETY, RELIABILITY, QUALITY, & MAINTAINABILITY ASSURANCE.

SUSTAINMENT ENGINEERING AND LIFE  
CYCLE MANAGEMENT

## PROACTIVE APPROACH FOR BILLS OF MATERIAL ANALYSIS

- Part Status Information
- BOM Cleansing
- Identify Obsolescence
- Monitor PCN and EOL Alerts
- Search for Alternative Parts
- Perform Life-Cycle Analysis

### Identify Obsolescence

BOM and  
critical components.

### Locate Alternate Parts

Find form, fit and function equivalents  
for seamless replacement.

### Monitor Status

Remain proactive through email alerts  
of relevant PCNs and EOL notices.

### Perform Health Projection

Prepare for future changes using  
Life Cycle Prediction

## CUSTOM SOLUTIONS

Custom tailored databases  
based on your requirements and  
Needs- We survey and  
disposition parts and elevate  
potential Risks.

## FORM FIT FUNCTION REPLACEMENT

We do not end at obsolete  
components; we end with a  
Form Fit Function Solution.  
Our engineers are trained to  
ensure each FFF part complies  
with the governing requirements  
and standards.

flexible solutions for  
your component needs

## RISK MANAGEMENT

We are in the risk management  
business. We help control  
sustainment cost while controlling  
the potential risk associated with  
obsolescence and aging systems.

Let us know your concern, and we will  
help provide a solution, FREE OF  
CHARGE. If we can help build a  
relationship through simple advice  
and guidance, we are here to support  
you!

WE ARE DIVERSE, HENCE OUR SOLUTIONS ARE DIVERSE! HOW CAN WE HELP YOU?
